

Convivium 9, Monot
55 sqm 1 bedroom

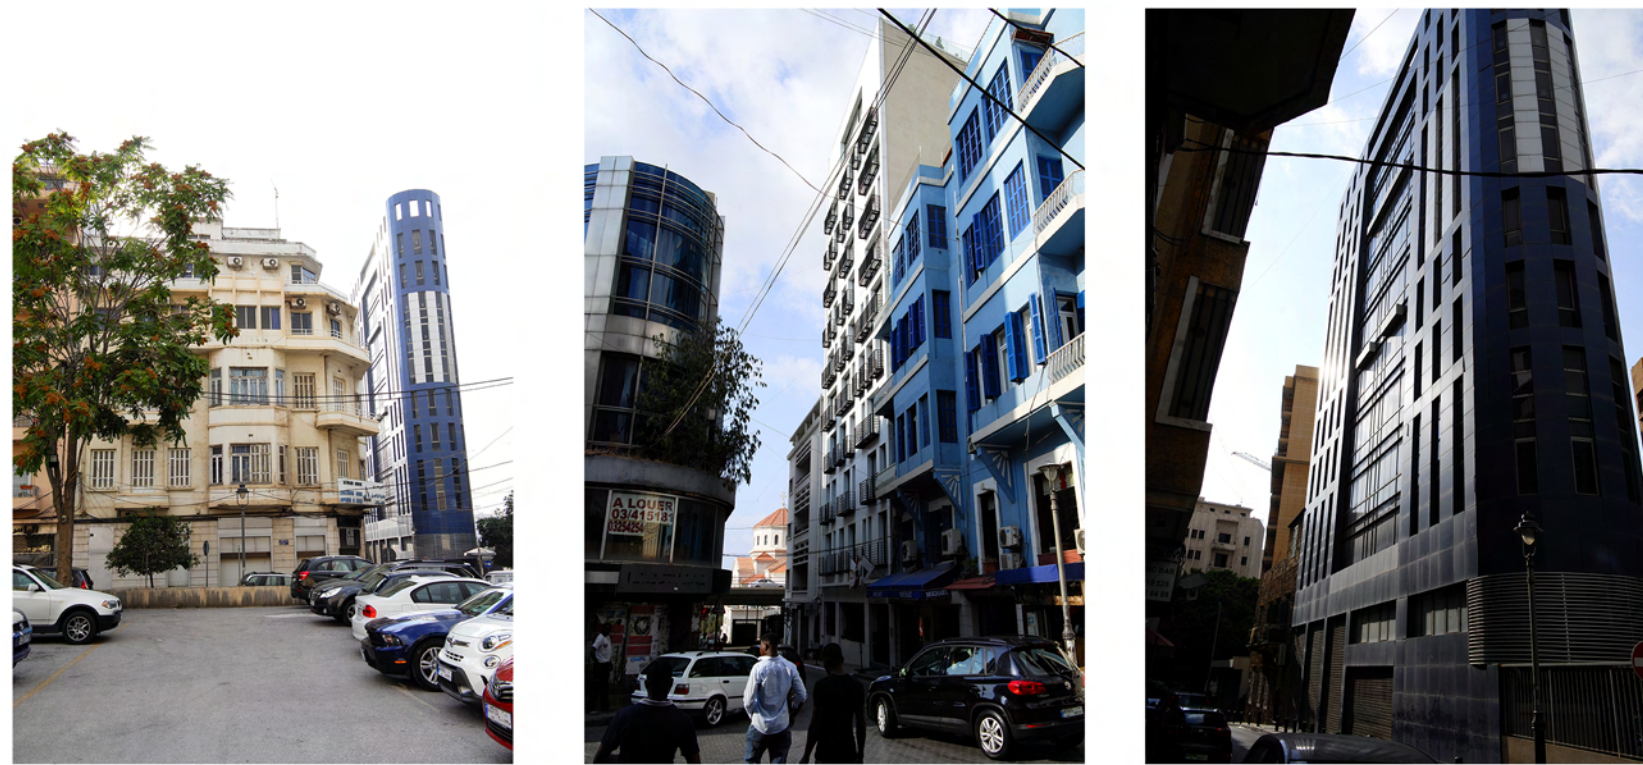

Location

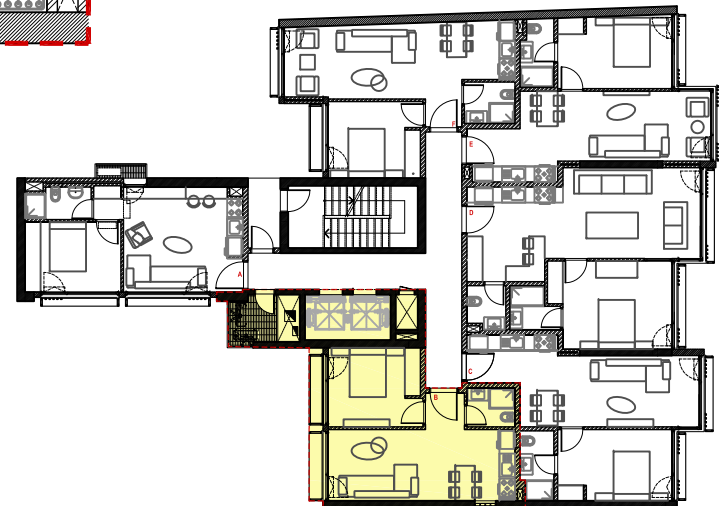

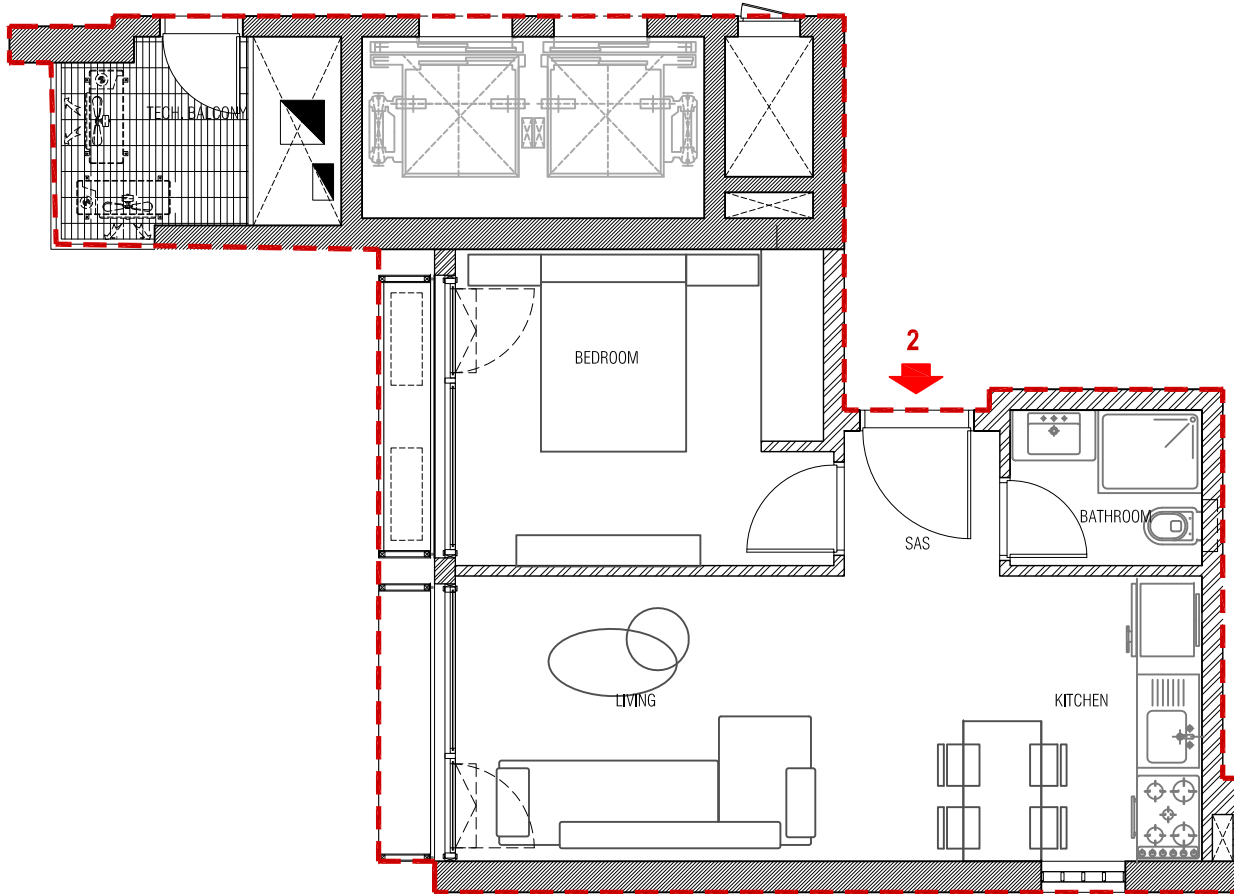

The site lies amidst the developing vicinity of Monot. The neighborhood's charm is composed from its hybrid nature. Buildings that date back to the late 30s, stand side by side with those from the 50s and 60s period up until recent developments. The superposition of architectural styles has blurred the site's interpretation as one clear identity; rather a mixture of styles dominates the neighborhood. The street, therefore, is animated by these juxtaposed buildings, their projected balconies, and their residents
